To whom it may concern,

On Feb. 9th I drove our 2014 Hyundai Elantra around the corner to pick up my friend. I pulled into the driveway intending to park the car behind my friend's car. As I applied the brakes the car leaped forward crashing into my friend's car. My friend's car was damaged and my car had almost \$9000 in damages. We had to pay a \$500 deductible and we also rented a car for a week which was almost \$300. The bill from Cavallo's Auto Body shop is attached. We did not call the police so we do not have an accident report.

Less than 2 weeks later after we received our car back, I had a similar situation occur. On March 3rd around 5 AM, I drove my car to the Wawa, as I applied the brakes to stop the car while parking the car lunged again into metal poles in front of the store. More damage occurred but thankfully I was not physical injured.

We did not get the car fixed again, but we did complete an accident report, which is attached. I have a video from Wawa but I cannot attach that.

We called the Hyundai Dealership where we bought the car to let them know and to have them check the brakes out but they said the car was fine.

We have not driven the car since that time because we do not feel like safe to drive it. I am afraid of injuring myself, my family or a 3rd party. We continue to pay for it because I don't want to mess up my credit.

We would appreciate any help in having this situation resolved.

Regards,
