To whom it may concern:

I'm writing to complain about the brightness of the headlights on 2017 Land Rover Range Rovers. The headlights are exceptionally bright and make driving around them difficult. This brightness is exacerbated by the height of the vehicle. Even with the low beams on, these headlights are blinding in a rear view mirror or as oncoming traffic. The xenon lights from these vehicles are dangerous and should be dimmed or aimed downward so as not to blind other drivers, particularly those in lower riding cars.

Thank you for your attention to this matter.

Best,
