Subject: 2015 vw jetta

I would like to register a complaint about my 2015 Jetta TDI. The ignition will not turn off it's a Tumblr issue in the key, they say it's common in Volkswagens and they can't keep the parts on the Shelf. What happens if it starts shutting off by itself with the ignition problem this is going to be unsafe and could cause a catastrophe on the highway. This is a safety issue and needs to be recalled thanks [REDACTED]
