Subject: Change of values in fields in Artemis, ODI 11031351
Importance: High

ODI 11031351 requires changes in the INJURIES and DEATHS fields. Both should be listed as zero (0). I spoke with the consumer today and he described the incident as:

The vehicle was running and his wife pulled into the garage. Before she could turn off the vehicle the PASSENGER wiper arm/blade section broke from the linkage (section that attaches to the motor). The blade went flying but did NOT hit anyone. No one was injured and there were no fatalities.

Please do not hesitate to contact me if you have any questions. Additional information about the incident can be found in Advanced Case Manager (ACM) for this ODI entry.
