in July 2016 Ford recalled my Ranger for defective air bag since then theyve told me not to use passenger side because its too dangerous but it seems too me they are no where closer to making a replacement I think their just waiting till my truck has no value over

then will offer me money for it meanwhile
I can't trade my truck or use it since I have
a wife and we go out together. I do use
it to go back and forth to work still. As of now
it's been one year 5 months and if you check
I don't think they have designed much less built
any replacements - it is the passenger side
air bag.

thanks alot for your time
