Dear Sirs:

In May 2018, I filed a NHTSA complaint concerning a safety recall on my two vehicles. This concerns Safety Recall Notice 16S41/NHTSA 16V-777. My complaint numbers are 11092746 and 11092750. I have been waiting since Dec 2017/Jan 2018 for a repair to my fuel delivery modules. I am at risk of a crack in the fuel supply port which can result in a leak, possibly resulting in a fire. For the last seven months Ford has been telling me that the part is not available. I think this is inexcusable and puts lives and property at risk. There must be a satisfactory way to resolve this issue.

Many thanks for any possible assistance,

Sincerely,

AM
