My 2013 MAZDA3 (VIN Number)
JMI8L1UP3D1 [REDACTED] has for the
second time developed Headlight
Condensation. This started in 2016,
which was subsequently repaired at Mazda's
Court, even though my mileage was over
50,000 miles.

This headlight condensation
reappeared in 2017, with repeated
attempts to have MAZDA Hd in claims
California correct. Finally a rep from MAZDA

Walter left a message for me
on my cell phone, stating that
MAZDA will again repair, at
a cost of \$240.00!

Now I am cognizant that at
76,000 miles on my odometer, that
my MAZDA 3, has exceeded the
warranty period; However, this
"issue" is an inherited defect
that is reportedly prevalent
plaguing MAZDA 3's!

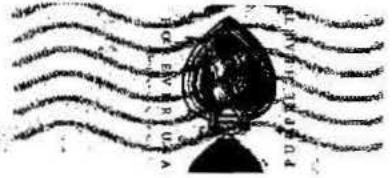

Please consider this a complaint
against MAZDA for failing to
resolve this prevalent vehicle
problem.

Yours in Safety, (NYS DMV Reg.)
