Re: Report of Seat Belt Failure and Total Airbag Failure
2013 Nissan Altima
Vin # 1N4AL3AP4DC [REDACTED]

Dear Sirs:

This is to advise that the above noted Nissan Altima suffered a complete failure of the driver and passenger air bags during violent frontal collision that occurred in Aurora, Colorado on April 10, 2018. The failure of the deployment of the airbags and seatbelt caused the driver to suffer serious injuries.

The driver, [REDACTED] had her seat belt on but it did not operate and neither did any of the air bags (at least 6 in the vehicle). [REDACTED] hit the windshield with her head and lost consciousness. She woke with a fireman asking her questions about her condition. Apparently the fire department was the first on the scene and the fireman removed her from the driver's seat and walked her over to the passenger side of her vehicle. [REDACTED] was taken to University Hospital ER, held for 6-8 hours, and told she had a minor bleed in her head.

If any additional information is needed, please do not hesitate to contact me.

Sincerely,

George A. Kokus
