Washington, DC 20590

March 12, 2019

[REDACTED]
Rancho Cucamonga, CA [REDACTED]

NEF-109 ela
Ref. No. 11153791

Dear [REDACTED]

Thank you for your correspondence concerning your model year (MY) 2006 Lincoln Zephyr vehicle. The National Highway Traffic Safety Administration's (NHTSA) Office of Defects Investigation received your correspondence. Our office received an unprecedented increase in the number of correspondence last year. Our limited resources were overwhelmed and we are now just getting to your letter. We regret any inconvenience this delay may have caused you.

NHTSA is the Federal agency responsible for improving safety on our Nation's highways. We are authorized to order manufacturers to recall and repair vehicles or motor vehicle equipment when our investigations indicate that they contain safety defects in their design, construction, or performance. We also monitor the completion rate and adequacy of manufacturers' recall campaigns.

We are aware of the delay for NHTSA Safety Recall Campaign No. 16V-384. The recall addresses a problem with Takata front passenger-side air bag inflators in certain MY 2006 through MY 2011 Lincoln Zephyr vehicles. In the event of a crash necessitating deployment of the front air bags, these inflators may rupture due to propellant degradation occurring after long-term exposure to high absolute humidity and temperature cycling.

The recalls of defective Takata inflators have grown over the past few years to include 19 separate vehicle manufacturers and currently include approximately 40 million vehicles in the United States, making it the largest, most complex recall in NHTSA's history. The most significant challenge presented by this recall has been the availability of remedy parts, which has been affected by numerous factors including, but not limited to, the need to obtain redesigned parts from alternative inflator suppliers, testing to ensure the safety of remedy parts, manufacturing and capacity constraints given the enormous global demand, and logistics in getting the parts out to the distribution networks and into the dealer's hands.

The agency issued an amended Coordinated Remedy Order in December 2016, to order affected vehicle manufacturers to accelerate recall repairs and prioritize vehicles to reduce the risk of rupture and protect the American public. The Order attaches a prioritization schedule for all

vehicles currently affected by the recall, or that will become affected by future expansions, based upon known risk factors such as the age of the inflator, the geographic location of the inflator, and the location of the inflator in the vehicle.

When you receive a notification that parts are available, you should contact your dealer to schedule a service appointment immediately. If you are unable to schedule an appointment after receiving a notice that parts are available, you should notify the agency so that we may investigate whether the vehicle manufacturer has violated the Coordinated Remedy Order. You can file a complaint on our website at <https://www-odi.nhtsa.dot.gov/VehicleComplaint/> or via NHTSA's Vehicle Safety Hotline at 888-327-4236.

For the most up-to-date information on the Takata recalls, we also encourage you to visit our website at www.nhtsa.gov/recall-spotlight/takata-air-bags.

Should you encounter a safety-related problem with a motor vehicle or motor vehicle equipment in the future, we would appreciate it if you would file a complaint on our website or hotline listed above. Also, a summary listing of vehicle owners' complaints, safety recalls, manufacturers' service bulletins, etc. can be obtained at our website.

Sincerely,

A handwritten signature in cursive script that reads "Randy Reid".
