2012 Toyota Yaris

VIN# JTDBT4K33CL [REDACTED]

Inspected: Total Car  
Recall  
March 15, 2013

Mr. Jeffrey Giuseppe and Mr. Cory Hoffman,

This Vehicle came on our lot at the end of February, 2013. The car was experiencing major manufacturing defects and shouldn't be resold or operated. Before it could be explained, the owner left the lot and didn't return. We made every attempt to locate the vehicle, and initiated a state wide alert.

The Yaris Vin Number came up, that it was sold in Wisconsin, April 2017.

When inspected:

1. LF Underbody wasn't made for this model. It doesn't fit or secure properly, causing it to shift against and fall down on the tires.
2. Inner Fender-LF, Fender -LH, and Inner Shield- RF wasn't made to fit for this model.
3. 4 Faulty wires/fire hazard
4. Gas pedal when pressed down doesn't engage right away. Needs a replacement system.

There are too many hazards on this Toyota Yaris. It should not be on the Road. I sent a recall in for this vehicle in March, 2013.

Thanks,
