February 20, 2019

To Whom It May Concern:

I am writing concerning a recall that I received in February 2016 on my Monte Carlo SS where the valve cover gasket was leaking and it was indeed doing this.

I took my car to have it repaired at Royal Oaks, Paducah, Ky on 3/9/16. From what I knew everything was done and OK. When I took my car to have the oil changed the next time, I noticed at the bottom of the page they stated that my valve cover gasket was leaking. I didn't pay any attention to it cause I just figured it was where they had warned me as they had done in the past and just failed to take it off when I had this repaired. It shouldn't have been leaking at all at that time.

Well, when I took it again, I finally took notice this was still on the bottom of the page in the "Notes" section. When I took it on 1/28/19, it was there. I called the place that changed my oil and questioned it. Ask if they just failed to take this off in this section since it had been repaired in 2016 or was it in fact "leaking" again. I was informed it had been leaking every time it was brought in. I was pretty upset about this since it was supposed to be repaired in 2016....

I in turn called Royal Oaks to ask them about it leaking so soon afterwards it being repaired and I was informed that there was nothing they could do about it and if I wanted to have it re-done, it would cost me \$500.00+. I questioned if could have been done wrong or something not installed right if it was leaking so soon. I got really no comment. I then ask if it should be leaking immediately after the repairs as it was years before it leaked the first time and now it was leaking a year after repairing. I was told could, but not likely....I am confused and concerned as well.

Can you tell me if this sounds right to you? Would it be leaking so soon after repairing? I'm sorry it took me this long to ask about this, but I do have records of it being flagged as a warning on every oil change receipt I have since 2017. Does this sound like it was in fact repaired correctly? I would love to have a response from you so I will know not to take it back to this place again if something else needs repairing....especially since he wouldn't honor their work and was not concerned about it...

I have enclosed the recall letter, the repair statement and my last oil change statements. There are only 2 changes since then with only 2,610 miles put on this car. Reason for this is because I bought a Dodge Charger 3 years ago and I drive it alot, but do rotate the two vehicles...I have knee problems and this is why I bought the Dodge, it sits up higher than the SS.

Can you tell me if it sounds right that this gasket be leaking with only 2600 miles being put on it? Thank you for your prompt response...

IMPORTANT SAFETY RECALL

February 2016

Paducah, KY [REDACTED]

This notice applies to your vehicle, VIN: 2G1WX15K419 [REDACTED]

Dear [REDACTED]

This notice is sent to you in accordance with the National Traffic and Motor Vehicle Safety Act.

Previously, you were notified that your 2001 model year Chevrolet Monte Carlo was involved in GM recall 15757. This letter is to inform you that parts are now available to repair your vehicle.

General Motors has decided that a defect which relates to motor vehicle safety exists in certain 2001 model year Chevrolet Monte Carlo vehicles equipped with a 3.8L V6 engine. As a result, GM is conducting a safety recall. We apologize for this inconvenience. However, we are concerned about your safety and continued satisfaction with our products.

IMPORTANT

- Your vehicle is involved in GM recall 15757.
- Schedule an appointment with your Chevrolet dealer.
- This service will be performed for you at **no charge**.

Why is your vehicle being recalled?

Drops of engine oil may be deposited on the exhaust manifold through hard braking. This condition could cause an engine compartment fire.

What will we do?

Your Chevrolet dealer will replace your engine's front valve cover and front-valve-cover gasket with new parts of an improved design. Your engine's plastic "beauty" cover and plastic oil-fill-tube extension will be removed, if they haven't been already. This service will be performed for you at **no charge**. Because of service scheduling requirements, it is likely that your dealer will need your vehicle longer than the actual service correction time of approximately 35 to 55 minutes, depending on your vehicle's engine configuration.

What should you do?

You should contact your Chevrolet dealer to arrange a service appointment as soon as possible.

GM

This condition does not affect the safe operation of the vehicle, but it is recommended that the vehicle be parked outside and not in a garage or other structure until it is repaired.

Did you already pay for this repair?

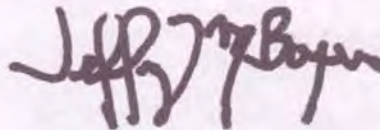

Even though you may have already had repairs for this condition, you will still need to take your vehicle to your dealer for additional repairs. If you have paid for repairs for the recall condition, and have not previously submitted, please complete the enclosed reimbursement form and present it to your dealer with all required documents. Working with your dealer will expedite your request, however, if this is not convenient, you may mail the completed reimbursement form and all required documents to Reimbursement Department, PO Box 33170, Detroit, MI 48232-5170. The completed form and required documents must be presented to your dealer or received by the Reimbursement Department by February 28, 2017, unless state law specifies a longer reimbursement period.

Do you have questions?

If you have questions or concerns that your dealer is unable to resolve, please contact the Chevrolet Customer Assistance Center at 1.800.222.1020 (TTY 1.800.833.2438).

If after contacting your dealer and the Customer Assistance Center, you are still not satisfied we have done our best to remedy this condition without charge and within a reasonable time, you may wish to write the Administrator, National Highway Traffic Safety Administration, 1200 New Jersey Avenue, SE., Washington, DC 20590, or call the toll-free Vehicle Safety Hotline at 1.888.327.4236 (TTY 1.800.424.9153), or go to <http://www.safercar.gov>. The National Highway Traffic Safety Administration Campaign ID Number for this recall is 15V701.

Federal regulation requires that any vehicle lessor receiving this recall notice must forward a copy of this notice to the lessee within ten days.

Jeffrey M. Boyer
Vice President
Global Vehicle Safety
