Hello [redacted] is requesting your help with information.

- ① How many feet is cover in distance when a vehicle is traveling at 65mph for only one second?
- ② Provide information on a vehicle colliding with an tree at 65mph on the front right side of the vehicle. Then vehicle rotated to the left.
- ③ In early 2017 I found out about a couple of recalls, please send the info. I was involved in an accident. When the vehicle left the road it collided with a tree. That was an estimate up to 50 feet from the road. The vehicle ended up pinned between two tree, that the 2 trees are an estimate six feet apart. The accident happen at night on a dark highway during a thunderstorm.

Thank you

Respectfully
