

Follow these instructions¹ to download the Office of Defects Investigation (ODI) Complaints data and import them into Microsoft Access. ODI Complaints data are available in the compressed data (ZIP) format on the ODI web site.

The system characteristics of the target machine will affect the speed and performance of the processing needed to accomplish the downloading and importing of the Complaints data. At least 2GB of available disk space is required. This space requirement will increase as more data are continually being added to the ODI database.

Detailed field descriptions of the data file are given in Appendix A.

Note: For consistency the original file name **FLAT_CMPL** is used throughout these instructions.
