Dear NHTSA:

I would like to file the following complaint:

Make and Model: 2019 Nissan Leaf SL

Problem: Possible violation of FMVSS on seat belt reminder. There is no audible warning when front seat belts are not buckled. A small light on the dash is the only alert. Even driving the vehicle at higher speeds (over 35mph) and a long period of time does not trigger the audible sound.

Observation: This is the first car I have ever owned without an audible warning when the front seat belts are not fastened. An audible reminder would help ensure other member of my family, namely my teen drivers, to buckle up.

Sincerely,

Highlands Ranch CO
