I also forgot to let you know that the airbag light was going on and off, but now it is staying on due to the condensation. We called Volkswagen headquarters again today and they are not entertaining this problem. We did not cause this defect they did and something should be done it is highly dangerous.

I am following up with this manufacturers defect on my Volkswagon Tiguan. I would like to know if we are getting closer to a recall on this major problem. I am sending more pictures. Please get back to me.

Thank You,
