Subject: Air bag Clockspring Recalls

There was a recall on the clockspring causing the Airbag light to stay on in 2010-2011 Jeep Wrangler. However mine is a 2011 and it has a faulty clockspring causing this issue and I was told they picked certain vin numbers and mine wasn't one they picked. If they recalled those years which mine is then my vehicle should be fixed regardless of the vin number because it's the year of the faulty clockspring not the vin number.
