[REDACTED]
Beaver Falls, PA [REDACTED]

NEF-109 tgd
Ref. No. 11325790

Dear [REDACTED]:

Thank you for the letter about your model year (MY) 2007 Toyota Corolla vehicle. Your letter was forwarded to the National Highway Traffic Safety Administration's (NHTSA) Office of Defects Investigation. I am pleased to respond.

NHTSA is the Federal agency responsible for improving safety on our Nation's highways. We are authorized to order manufacturers to recall and repair vehicles or motor vehicle equipment when our investigations indicate that they contain safety defects in their design, construction, or performance. We also monitor the completion rates and adequacy of manufacturers' recall campaigns.

We appreciate the report you provided. Reports from motorists are a very important source of information for NHTSA. We are aware of NHTSA Safety Recall Campaign No. 19V-741. The recall addresses a problem with Takata front passenger-side air bag inflators in certain MY 2003 through MY 2013 Toyota Corollas among other vehicles. These vehicles had their driver or passenger frontal air bag inflators previously replaced under a prior recall using inflators of the same design. Toyota dealers will replace the like-for-like inflator with one that has an improved and safer design.

The Takata air bag inflator recalls are the largest and most complex recalls in U.S. automotive history. These recalls include 19 vehicle manufacturers and currently include approximately 63 million inflators in the United States alone. We entered your vehicle identification number (VIN) in our VIN Look-Up Tool and it appears that you have since received the recall repair—there are no open recalls on your vehicle. In any event, we understand your frustration with any inconvenience you may have experienced and appreciate your diligence in this matter. We recommend that you contact Toyota or your dealer regarding any unresolved issues with the recall.

We entered your information into our database. It will be used with other reports to identify any safety defect trends that may require our attention. You can learn more about NHTSA's

investigation and recall process on our website at
https://www.nhtsa.gov/sites/nhtsa.dot.gov/files/documents/mvdefectsandrecalls_808795.pdf.

If you encounter a safety-related problem with a motor vehicle or motor vehicle equipment in the future, please complete an electronic Vehicle Owner's Questionnaire online at www.nhtsa.gov or call the Vehicle Safety Hotline at 888-327-4236. Also, owners' complaints, safety recalls, manufacturers' service bulletins, etc. can be reviewed on our website.

Sincerely,

A handwritten signature in cursive script that reads "Randy Reid".
