I did not fill this report out! Not sure who did! I just looked up recalls for my vehicle. I reported that the car was malfunctioning & could have caused me to be run over by a truck getting on the interstate twice! I reported it to the dealer. The dealer took over the process bc the part was covered under warranty. It was fixed but is still acting up. They told me to wait til the light comes back on & bring it back in. I think the purge valve canister kit that was recalled on the 2014 & 2015 models could be the problem; but they said the 2016 had not recalled this part as of yet! That's where we are w/ the problem; they supposedly replaced the turbo charger boost a week ago!
