INFORMATION REDACTED PURSUANT TO THE FREEDOM
OF INFORMATION ACT (FOIA), 5 U.S.C. 552(B)(6)

Hi, I have a 2014 Ford Mustang V6 vin # 1zvbp8amxe[REDACTED] These stock drive shafts fail and break into pieces at speeds over 110 mph. If lower rear end gearing is installed they can fail over 100 mph. This should be added to the recall list to have Ford install good drive shafts in all 2011-2014 Mustang V6 cars to prevent this from happening. These are performance vehicles and should not be speed limited from the factory at 110 mph. Many people put a tune in them and remove top speed limiters. Thanks.
