Valencia, CA

NEF-109 ela
Ref. No. 11407653

Dear [REDACTED]:

Thank you for the letter about your model year (MY) 2021 Mazda 3 vehicle. Your letter was received in the National Highway Traffic Safety Administration's (NHTSA) Office of Defects Investigation. I am pleased to respond.

NHTSA is the Federal agency responsible for improving safety on our Nation's roadways. We are authorized to order manufacturers to recall and repair vehicles or motor vehicle equipment when our investigations indicate that they contain safety defects, such as in their design, construction, or performance. Among other activities, we also monitor the completion rates and adequacy of manufacturers' recall campaigns.

We appreciate the report you provided. Reports from motorists are a very important source of information for us. As new technologies develop, NHTSA is reviewing the safety and reliability of advanced driver aid systems (ADAS) in manufacturers' vehicles across the industry. We reviewed our database to identify whether a safety defect trend exists with the Smart Brake Support in MY 2021 Mazda 3 vehicles. At this time, NHTSA has not identified sufficient evidence to open a safety defect investigation or to initiate a recall.

We entered your information into NHTSA's database, where it will be used with other reports to identify any safety defect trends that may require our attention. You can learn more about NHTSA's investigation and recall process on our website at https://www.nhtsa.gov/sites/nhtsa.dot.gov/files/documents/mvdefectsandrecalls_808795.pdf. We recommend that you continue to work with Mazda or your local dealer to resolve this matter.

If you encounter a safety-related problem with a motor vehicle or motor vehicle equipment in the future, please complete an electronic Vehicle Owner's Questionnaire online at www.nhtsa.gov or call the Vehicle Safety Hotline at 888-327-4236. Also, you may review owners' complaints, safety recalls, manufacturers' service bulletins, etc., on our website.

Sincerely,

Randy Reid, Chief
Correspondence Research Division
Office of Defects Investigation
