APPLICABLE INCIDENT INFORMATION

(Please describe in detail the Incident(s), Failure(s), Crash(es), Injury(ies).)

Crash ☐ Yes ☒ No	Fire ☐ Yes ☒ No	Number of Persons Injured	Number of Deaths	Reported to Police N
--	---	---------------------------	------------------	-------------------------

Narrative Description of Incident(s), Crash(es), Injury(ies).

Please describe (1) events leading up to the failure, (2) failure and its consequences, and (3) what was done to correct the failure; i.e. parts repaired or replaced (and if old part is available).

The contact owns a 2021 Aprilia RS 660. The contact stated that while driving 75 MPH, the vehicle began to make an abnormal vibrating sound as the alarm pressure warning light illuminated. Due to the failure, the contact initially had the vehicle towed to his house, and then the dealer informed him that there was a fractured connecting rod in the engine. The dealer contacted the manufacturer who agreed to repair the failure under warranty. The vehicle remained in the possession of the dealer and was not yet repaired. The failure mileage was 1,400.

Additional information: The vehicle lost power and the engine ejected motor oil from a quarter-sized hole in the engine casing caused by the fractured connecting rod. The vehicle is no longer operable.

Include, if available: Police/Fire Department Report, Photos, and Repair Invoice.
