

Administrator of NHTSA,

Upon receiving a letter dated May 11, 2021 about a safety recall on our RV, we contacted our Jayco RV dealer and sent a photo of the serial # on stove as requested.

As of today July 11, 2021 nothing has been done, we have not used our stove because of this and RV dealer keeps giving us different reasons for not rectifying the situation, ex. - They are too busy to take phone calls, lost paperwork, no staff to install, only getting one part sent to them at a time.

Anything you could do to help would be appreciated.
