Subject: Attachments for Complaint Number: 11436024
 To: nhtsa.webmaster@dot.gov

Hello,

Please find attachments in connection to my complaint #:11436024 which I was not able to submit with attachments via the website.

I was driving when the rear of my car began vibrating, then fishtailing and I lost control and hit a curb resulting in mostly forward damage. In reviewing the Preliminary Estimate from the auto-shop and insurance adjuster, there was quite a bit of damage to the Rear Suspension including a broken Trailing arm lock nut, washer, and bolt, as well as the Protector lining, lower control arm, its lock nut and the control arm mount bolt. The broken rear axle components caused me to lose control of my vehicle resulting in forward impact with a curb. My car was deemed a total loss with \$28K in estimated repairs.

Regards,

[REDACTED]

Audi Sedans, SUVs, Wagon Recalled for Suspension Problem

Drivers could lose control of the vehicle if a part of the rear axle breaks

By Keith Barry

Updated May 7, 2021

2020 Audi A4
Audi

Audi is recalling over 40,000 vehicles to fix a faulty suspension component that could cause a loss of control while driving.

Many newer Audi vehicles are involved in the recall, including the 2021 Q7, Q8, Q5 Sportback, RS Q8, and SQ5 Sportback SUVs, 2021 RS6 Avant wagon and RS7 sedan; 2020 and 2021 A4, S4, A6, S6, A7, S7, A8, and S8 sedans, Q5 and SQ5 SUVs, A4 and A6 Allroad wagons, A5 and S5 coupes and convertibles; plus 2019 through 2021 RS5 coupes, and A5, S5, and RS5 Sportback sedans.

Choosing It, Insuring It, Driving It

misaligned while driving straight
ahead, or that the vehicle pulls to
one side during braking or

acceleration. 1

An Audi spokesperson tells CR that the automaker is not
aware of any crashes or injuries related to this recall.

The Details

Vehicles Recalled

- 2021 Audi Q5 Sportback, Q7, Q8, SQ5 Sportback and RS Q8 SUVs
- 2021 Audi RS6 Avant wagon and Audi RS7 sedan
- 2020-2021 Audi S6 sedan
- 2020-2021 Audi Q5 and SQ5 SUVs
- 2020-2021 Audi A4, A6, A7, A8, S4, S6, S7, and S8 sedans
- 2020-2021 Audi A4 Allroad and A6 Allroad wagons
- 2020-2021 Audi A5 and S5 coupes and convertibles
- 2019-2021 Audi RS5 coupe
- 2019-2021 Audi A5 Sportback, S5 Sportback, and RS5 Sportback sedans

The problem: A faulty rear axle lock nut may break due to stress corrosion, which could lead to loss of vehicle control while driving.

The fix: Audi dealerships will replace the nuts and associated bolts, free of charge.

How to contact the manufacturer: Audi will contact owners of affected vehicles by First Class mail as soon as June 25, 2021. Owners may also call Audi at 800-253-2834.

NHTSA campaign number: 21V295

Check to see whether your vehicle has an open recall: NHTSA's website will tell you whether your vehicle has any open recalls that need to be addressed.

If you plug your car's 17-digit vehicle identification number (VIN) into NHTSA's website and this recall doesn't appear, it means your vehicle doesn't currently have any open recalls. Because automakers issue recalls often, and for many older vehicles, we recommend

Stay informed about recalls that might affect your vehicle using our Car Recall Tracker.

SUPPLEMENTAL INFORMATION

NHTSA VEHICLE RECALL

NHTSA Campaign ID : 21V295000

Mfg's Report Date : APR 25, 2021

Component : SUSPENSION:REAR:AXLE:NON-POWERED AXLE ASSEMBLY

Potential Number Of Units Affected : 40993

Summary : Volkswagen Group of America, Inc. (Audi) is recalling certain 2021 Q7, Q8, Q5 Sportback, SQ5 Sportback, RS6 Avant, RS7, RS Q8, 2020-2021 Audi S6 sedan, Q5, A8, S8, A7, A6 Allroad, A5 Cabriolet, A4 sedan, A4 Allroad, SQ5, S7, A6 sedan, S5 coupe, S4 sedan, S5 Cabriolet, A5 coupe, 2019-2021 RS5 coupe, A5 Sportback, S5 Sportback, RS5 Sportback vehicles. The lock nut on the trailing arm of the rear axle may break due to stress corrosion.

Consequence : A broken lock nut may misalign the rear axle, causing a loss of control and increasing the risk of a crash.

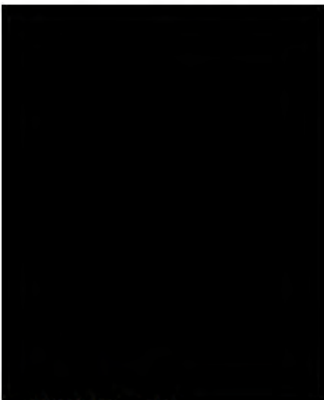

Remedy : Dealers will replace the lock nuts and, if necessary, the associated bolts, free of charge. Owner notification letters were mailed June 4, 2021. Owners may contact Audi customer service at 1-800-253-2834. Audi's number for this recall is 42L1.

Manufacturer Recall No. : 42L1

The National Highway Traffic Safety Administration has issued 1 safety related recall notices that may apply to the above valued vehicle.

Technical Service Bulletin

42 Rattle noise from the rear suspension

42 21 46 2038689/5 August 2, 2021. Supersedes Technical Service Bulletin Group 42 number 20-44 dated May 13, 2020 for reasons listed below.

Model(s)	Year	VIN Range	Vehicle-Specific Equipment
All	2015 - 2022	All	Not Applicable

Condition

REVISION HISTORY		
Revision	Date	Purpose
5	-	Revised header (Added Model Years)
4	05/13/2020	Revised header (Added Model Years) Revised <i>Required Parts and Tools</i> (Added Tools table)
3	06/20/2018	Revised header (Added Model Years)

Customer states:

- Clunking or rattling noises are heard from the rear suspension area when the vehicle is driven over bumps.

Technical Background

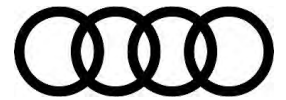

These noises can be caused by an improperly seated rear bump stop (which occurs when the rear bump stop was not fully inserted into the rear shock absorber mounting during PDI).

Production Solution

A bump stop installation tool (SET900) was developed to aid with the installation of rear bump stops during PDI (Figure 1). This tool provides the necessary leverage to seat the rear bump stop in the shock absorber mounting.

Figure 1. The SET900 bump stop installation tool.

Technical Service Bulletin

Tip: One SET900 tool was sent to all Audi dealers in November 2014. Additional tools can be purchased through the *Audi Special Tools and Equipment Program*.

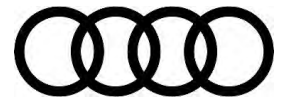

Service

To ensure proper installation of rear bump stops (in Audi models without air suspension):

1. Clean the top of the rear bump stops and coat with tire mounting paste.
 2. Use the SET900 special tool to fully press the rear bump stops into the upper shock mounts (Figure 2).
- The purpose of the tool is to properly seat the rear bump stops in the rear shock mounts (Figure 3), which will prevent them from dropping out of the rear upper shock mounts and causing the noise.

Figure 2. The SET900 tool being used to install a rear bump stop.

Technical Service Bulletin

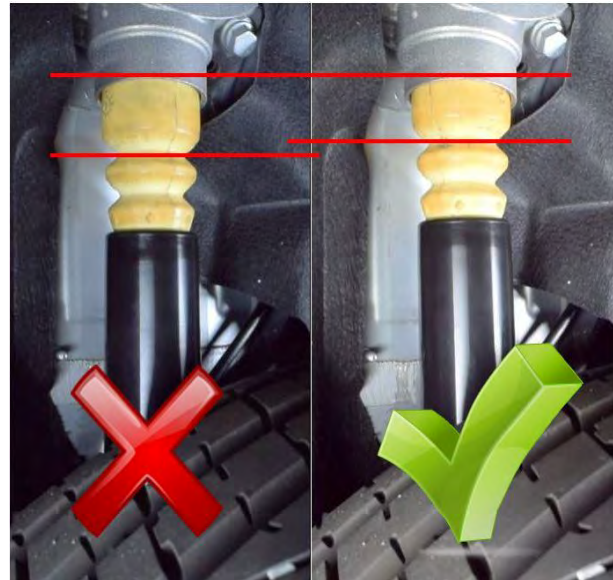

Figure 3. Comparison between rear bump stop installation without and with the SET900 tool.

Note:

Always ensure that the dust boot does not get caught on the top of the shock once the vehicle is lowered.

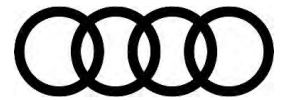

Tip: A video demonstrating the use of this tool is available at: <https://audi-external.kzoplatform.com:443/swf/player/286> (Figure 4).

See TSB 2039206: *00 Viewing TSB videos* for more information about viewing videos.

What happens now?

We'll send you an email within the hour to confirm we received your complaint.

We'll post your complaint to our website so others can see if someone else is having the same problem. It may take up to 72 hours to post to the public site.

Someone from our team will review your complaint — if we have questions, we might need to contact you.

Thanks for helping us make our roads safer!

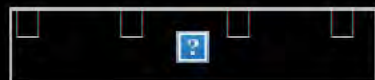

Please retain all information, documentation, photos, and/or evidence related to your complaint for at least five years, including any new information you get after filing this complaint. We may contact you for further information.
