NHTSA ID NUMBER: 10617218

COMPONENTS: AIR BAGS, ENGINE

The timing chain in this 2003 Saturn Ion broke due to cheap and inadequate design. It almost cost my girlfriends life. It died right in the middle of an intersection and an 18 wheeler almost took her out. I want and demand this motor be replaced because this is a serious problem and it's GM's fault. Do I need to find legal counsel? The vin is 1G8AJ52F732 [REDACTED]. 2.2 litre engine. This is a VERY serious matter!
