The contact owns a 2022 Hyundai Tucson. The contact stated while his wife was at a standstill, she depressed the accelerator pedal however, the vehicle failed to move forward for several seconds. The contact stated no warning light was illuminated. The contact stated he had also experienced the failure on multiple occasions. The contact took the vehicle several times to the local dealer however, the mechanic was unable to duplicate the cause of the failure. The manufacturer had not been informed of the failure. The failure mileage was approximately 500.			
The manufacturer has been informed of the problem but has been very slow to react. Car still failing to move ever so often and now has over 6000 miles on it. Still a safety issue in my mind as sometimes when you want the car to move and it needs to move it will hesitate for four or five seconds
