The contact owns a 2019 Chevrolet Blazer. The contact stated that whenever it rained, water would leak into the vehicle from the gasket around the sunroof. The headliner would catch the water and disperse water down the interior pillars, forming puddles in the front and rear passenger's floorboards. The contact had not taken the vehicle to a local dealer or independent mechanic. The vehicle had not been repaired. The manufacturer had been informed of the failure. The failure mileage was approximately 40,000.

Include, if available: Police/Fire Department Report, Photos, and Repair Invoice.
