Dear NHTSA:

On Monday 26, 2021 I experienced something out of the ordinary and my control. As I was parking my new Toyota Corolla Hybrid LE Sedan, it accelerated by itself to an astronomical speed and stopped after going over a barrier causing damage.

As I wanted to place it in reverse it took off at a terrible speed hitting a parked car causing damage as if I had driven 50 miles per hour withing a distance of 20 to 30 feet. My new Corolla has been driven only 600 miles. I am in fear of driving this car once it is fixed by the body shop. This accident could have happened in the open highway with deadly results. Fortunately I am fully insured and without a scratch. I am in need of someone to please investigate this event. The car is presently at the Kendrick Body Shop at 1333 Broad Street, Augusta Georgia 30901. Phone number 706-724-4071. My phone number is [REDACTED] if you have any questions.

Sincerely,

[REDACTED]

TG
