The contact owns a 2022 Subaru Outback. The contact stated the vehicle was parked outside his driveway for four days; however, while approaching the vehicle, he noticed that the front windshield was cracked. The contact stated that no object had struck the windshield to cause the crack. The vehicle was taken to the dealer and photos were taken and sent to the manufacturer. The manufacturer was contacted and stated that the complaint was reviewed and the replacement might not be covered under warranty. The failure mileage was 7,000. <i>It appeared that the windshield had spontaneously cracked because it was parked for 4 days and there was no evidence of an impact.</i> <i>The glass shop that did the repair and the Subaru Dealer both said there was a microscopic chip that could have caused the crack.</i>							
Include, if available: Police/Fire Department Report, Photos, and Repair Invoice.
