National Highway Traffic Safety Administration
1200 New Jersey Avenue SW
Washington DC 20590

Dear Sir,

I am writing this letter regarding a safety recall notice I received in the mail. It's #09047C product safety engine compartment fire dated March 13, 2016. The vehicle I have is a 1999 Pontiac Grand Prix GT equipped with a 3.8L V6 naturally aspirated engine (RPOL36-VIN K). The condition stating General Motors has decided that a defect which relates to motor vehicle safety exists in 1997-2003 model year vehicles equipped with a 3.8L V6 naturally aspirated engine (RPOL36-VINK). Some of these vehicles have a condition in which drops of engine oil may be deposited on the exhaust manifold through hard braking. In rare cases, if this condition occurs and if a hot surface ignition source were present an engine compartment fire could occur. The correction that has to be made is that 2 or both valve cover gaskets need to be replaced on the engine, not just one. The front valve cover is black in color and the gasket is needed to be replaced or updated to correct a problem that is existing. The oil is seeping from both front and rear valve covers. The gaskets should be replaced on both sides on this engine, not just the front. When starting this motor in the morning, I still see smoke coming from the back side of this motor. Gasket # 25532619 should be replaced on both sides front and rear of this engine and new valve covers should be installed to complete an update. As a G.M. customer, I am not satisfied with a recall with this setup. Safety is the number one priority of keeping a customer coming back to your product, not oil leaking from a motor to cause an engine fire. Somebody's life might be at risk. I so respect the dealership I took the car to. They helped me in solving issues with the car. The car is very well built but can be made better. The other issue I encountered was a faulty O2 which is also on this engine. The engine will not perform properly. There are 2 O2 sensors on this engine; one in the rear of this motor and one before the catalytic converter. One before the catalytic converter was very clogged and very difficult to remove and replace. The mechanic had to heat this part up to be removed. He also broke his ratchet to remove this part. Once the part was removed and replaced, the car performed better. Replacing a faulty O2 is half the battle of these engines not performing properly. It is part of a tune up, if you can remove them. Some of these parts are frozen in so tight, they are hard to remove. They can be made better. Using never seized compound on these parts do help in removing them. I do respect the letter Safety Recall Notice. Please update me if any further action will be taken.

Thank you.

BR

General Motors Product Field Action
Customer Reimbursement Request Form

This section to be completed by customer (please print)

Customer Name: [redacted]

[redacted]

City: Nutley State: NJ Zip Code: [redacted]

Daytime Telephone Number (include Area Code): [redacted]

Evening Telephone Number (include Area Code): [redacted]

Date Request Form and Supporting Documentation Submitted to Dealer: 11/5/2022

Vehicle Identification Number of Involved Vehicle: 1G2WP12K6[redacted]
(17 Characters)

Mileage at Time of Repair: 109 143 Date of Repair: 11/11/2022

Amount of Reimbursement Requested: $ 587.49

THE FOLLOWING DOCUMENTATION MUST ACCOMPANY THIS REQUEST FORM.

Original or clear copy of all receipts, invoices and/or repair orders that show:

- The name and address of the person who paid for the repair.
- The Vehicle Identification Number (VIN) of the vehicle that was repaired.
- Description of problem, the repair performed, date of repair and who performed the repair.
- The total cost of the repair expense that is being requested.
- Proof of payment for the repair in question and the date of payment.

My signature to this document attests that all attached documents are genuine and I request reimbursement for the expense I incurred for the repair covered by this letter.

Customer's Signature: X [redacted]

Submit this request form and the required documents to your GM dealer for processing. All reasonable and customary costs to correct the condition described in the letter that came with this form will be considered for reimbursement. If your request is approved, you will receive a check from your dealer. If your request is denied, you will receive a written explanation for the denial from your dealer. If your request is incomplete, your dealer will advise you what documentation is needed to complete the request and offer you the opportunity to resubmit the request when the missing documents are available. If you have any questions about this process or have waited 30 or more days for a response from your dealer, please contact the GM Customer Assistance Center at 1-800-204-0261.

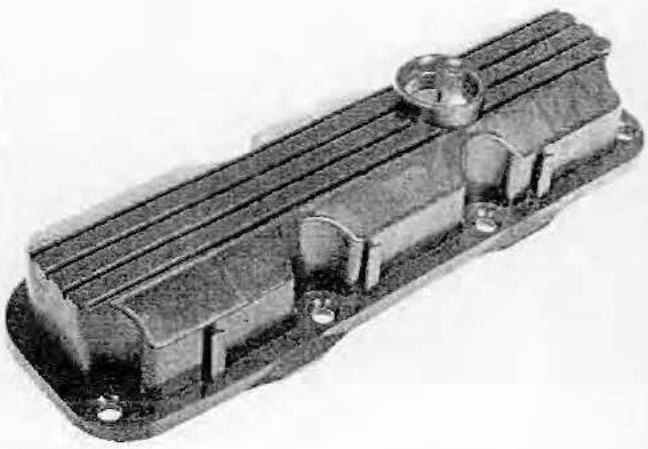
Dorman

Valve Cover

Part Number: 264-966

Price: $59.99 *Prices and availability are subject to change*

Warranty: Lifetime



Features & Benefits: This replacement valve cover matches the fit and function of the original equipment part that may be damaged or warped. Made from quality materials for excellent fit and superior heat resistance, this valve cover has undergone extensive testing.

- Direct replacement - this valve cover matches the original equipment part for fit and function
- Durable construction - this valve cover is made of quality materials to withstand extreme temperatures to resist leaking
- Cost-effective solution - offers original equipment performance at competitive price
- Quality tested - this part has undergone try-on and material testing to ensure a quality fit and reliable service

Color	Black
Width	4.75
Oil Filler Cap Included	No
Material	Plastic
Valve Cover Type	Standard
Finish	Black
