I logged a complaint about my 2018 Winnebago Motor Home on a Freightliner Chassis back on 2/4/2023. I feel that Freightliner has take the easy way out and I know they are no longer working towards a workable solution for all those Motor Home owners from 2017 -2023 for which they issued a recall to eliminate our rear inside tire TPMS monitoring system. I feel not having a TPMS (tire pressure monitoring system) for which we paid for to make our vehicle safer is a hazard to us and others on the highway.

Monthly I have checked your site to see if you have addressed this issue with Freightliner and requested that they develop a workable solution.

I have not seen any movement to address my complaint.
