I called the Cadillac Manufacturer to inform them that this car was not safe, I was told they had a recall to replace these lights. I informed the dealership I got the car from and they told me that was the kind of light that Cadillac put on those vehicles. I am almost [REDACTED] and this is not good. I was told that it was over for them replacing the light. I am stuck I was told they put these lights on these vehicle and they know a lot of people has been complaining this why the done a recall on them which I was not aware of the lights on this car till i bought the car I had to pull over because i thought the light was not on it just that bad. It got to be something for them to do regardless of who had this car before me. It is very unsafe for you to drive this car at night. Why would they want to take off this lighting if the recall was done? This is the worst thing to happen to a car. You can not see that this car is dangerous to the public.and to the owner they need to fix this.
