Please accept this edit - I for some reason lost a paragraph that explain the incident and only send the background info.

Wipers are to slow to safely see during a downpour of train. Went to dealer and was told nothing was wrong with wiper speed. This is my 4th Toyota and 3rd Camry all other cars had a faster speed. I noticed this before but thought it was me - however after a 9 hour drive during heavy rain - I realized it was the car.

The downpour was so bad that even on the fastest speed i could not see clearly - I had to drive on the express way at 40 mph with my flashers on --finally I just pulled over as it was not safe to continue driving.

I did google this issue and saw that others have had the same issue - and suggested advising you of the issue.

Thank you

Thank you,

Ann-Marie Ambrose
