RE: Recall Notice

Gentlemen:

I received a recall notice on my 2013 Hyundai Santa Fe over three months ago. This recall had to do with ABS fluid leaking and possibly causing a fire in the engine compartment whether the vehicle is being driven or is parked.

As of this date, my local Hyundai dealership is still telling me there is no repair available to rectify this. I am a senior citizen and this is my only vehicle. I depend on it for my every need outside my home. Needless to say, I am very concerned that after all this time there is still no repair available.

I am writing to ask that you investigate this situation and give me some idea when I can expect to have my car made safe again. Thank you so much for your assistance with this matter.
