Thank you. Did not see a copy of the complaint. Primary concern is that unexpected emergency braking for no apparent reason on our 2023 Tesla Model 3 was dangerous and could have caused a collision if there had been traffic on the highway. Scheduled an appointment with Tesla. However, dealer indicated that their review of the data for the approximate date and time did not show anything and cancelled the appointment. I scratched my head and was able to download the telemetry for the day. Unfortunately, no telemetry existed for the day prior to, during or shortly after the event. Telemetry for the balance of the day after the event (as well as for the day prior and after) was complete. Not sure why nothing existed during the relevant time period.
