

3-20-2024

Ford Motor Company,

I currently own a 2017 Ford Edge. It was recently (3-13-2024) discovered by the Ford dealership that I have an internal coolant leak. The Ford technician said this is a known engine defect in the 2.0L engines in my car's year and model. He recommended I replace my engine at a cost of \$10,000 to \$12,000. All my car maintenance has been done at the dealership. I suggested replacing the head gasket but was told the defect is in the engine and that would only provide temporary relief.

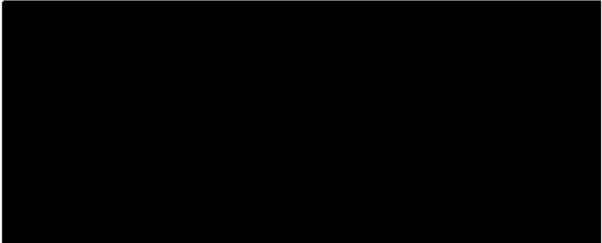

I have been doing some research on the internet and it appears this is a well-known issue with Ford. It is being chased by Lemon Law lawyers and is involved in Class Action lawsuits.

I am expecting Ford to stand by their product and replace my engine as it is a defect in the engine block.

I have been a Ford / Lincoln owner for the past 20 years if not longer.

I opened a case with Ford* but received a return call stating they will not do anything to assist with this issue.

This is neither an excellent product nor am I receiving excellent service. Perhaps Ford's Executive Chair, Bill Ford, should know how his customers are being treated.

Springboro OH

VIN: 2FMPK4J9XHE

*Ford Case ID:

I hope Ford stands by this:

"We see no conflict between business goals and social and environmental needs. I believe the distinction between a good company and a great one is this: A good company delivers excellent products and services; a great one delivers excellent products and services and strives to make the world a better place."

Bill Ford
Executive Chair, Ford Motor Company
