To Whom It Concerns @ NHTSA ~

My household is seeking to obtain salvage on a 2009 Nissan Versa 1.8 S HB that was abandoned a number of years ago because of a wiring malfunction, and I am reporting a possible safety defect within the tilt steering area that raises concern of a fire hazard within an enclosure that has a great deal of electrical wiring. It could also be the switch.

Furthermore, I'd like the NHTSA to forward this letter to the BBB (addressed above) if I am to be approved for arbitrary means by which a Nissan Service Manual &/or wiring diagrams, step-by-step diagnostic and adjustment procedures can be appropriately mapped out with instruction and illustrations. Replacement wiring, as an appreciation for the safety concern from Nissan, Lithia of Ames, IA, or Dymont Distribution Services, Strongsville, OH, would be lovely! I'd be willing to submit a recording or pictures of the wiring/tilt steering that need replaced and caused internal damage to the car.

If there are any recalls on a 2009 Versa, of which a salvage title can act upon, prior to the switch of ~~titleholders~~ &/or salvage stamp, please let us know. Extensive warranty coverage is the priority over obtaining a salvaged title in this case.

Keep me updated on how this may coincide with any options Nissan may have available, please.
