

To Whom it Concerns

I am the owner of a
2019 Nissan Leaf that has a
recall on the Level 3 charging
system. I have recieved
many letters telling me it
will be soon for them to
fix the issue and they still
haven't done a thing to resolve
this. I am [REDACTED] years old and
live on [REDACTED]

[REDACTED] and can't afford to
trade in with a payment every
month to upgrade. I live in
the [REDACTED] and it is many miles
to doctor visits and other
appointments and it causes me
much stress to keep going.
Please let me know anything
you can about my problem
