Narrative Description of Incident(s), Failure(s), Crash(es), and Injury(ies)

like the need for the recent recall for the front bearings, the bearings in the back were prematurely worn, requiring the need for extensive repairs \$800.00. In addition, we had to replace the original tires 430,000 miles. I do not know the details of the tires since they had already been replaced.

So far, there have been 2 recalls on this car. The dealer refuses to keep the necessary parts in stock, requiring 2 visits for each repair. No accommodations, i.e. extended hrs, loaner car etc. are made. One must wait more than a week to get an appointment and they aren't even nice.

The driver's seat belt will not always lock when fastened. This is extremely dangerous. Please investigate. Do not hesitate to call for more information.
