

Narrative Description of Incident(s), Failure(s), Crash(es), and Injury(ies)

My wife shut the passenger side door and it locked closed. It cannot be opened from either inside or outside with a key. The outside handle is in half way position. I had several locksmiths specializing in locked car doors try to open it and it could not be done. It certainly is a great safety hazard not being able to use that door, aside from great inconvenience.

I give you permission to use my name if you care to contact my car dealer or manufacturer.
