Year: 1996

Summary:

The front and/or rear hazard warning lamps (four-way flashers) do not flash when the hazard switch is activated. This fails to comply with FMVSS No. 108, "Lamps, Reflective Devices, and Associated Equipment."

If these lamps were not flashing, other vehicles would not be aware that this vehicle was stopped increasing the risk of an accident.

Dealers or vehicle owners will inspect for proper function of the hazard warning lamps. If necessary, dealers will replace the hazard lamp switch.
