NHTSA,

I am reporting the failure of the driver's side seat belt latch on a 1990 Toyota Celica. The latch return spring broke and remained inside the latch, making it difficult to securely fasten the seat belt. Enclosed is a form printed off the NHTSA Internet site with the relevant information. The service department at my local dealership required me to pay for the new part. I have the defective latch.

Sincerely,

A large black rectangular redaction box covering the signature and name of the sender.
