CUSTOMER INVOICE

the 1990s, the number of people in the UK with a long-term condition has increased by 50% (Department of Health 1999).

There is a growing emphasis on the need to improve the management of long-term conditions in the community. The Department of Health (1999) has set out a number of key objectives for the management of long-term conditions in the community:

- To ensure that people with long-term conditions are able to live as well as possible, and to prevent or delay the onset of complications.
- To ensure that people with long-term conditions are able to take control of their own health and to participate in decisions about their care.

These objectives are reflected in the National Service Framework for Long-Term Conditions (Department of Health 1999), which sets out the standards for the management of long-term conditions in the community.

The National Service Framework for Long-Term Conditions (Department of Health 1999) sets out the standards for the management of long-term conditions in the community. The standards are based on the following principles:

- People with long-term conditions should be able to live as well as possible, and to prevent or delay the onset of complications.
- People with long-term conditions should be able to take control of their own health and to participate in decisions about their care.

The standards are based on the following principles:

- People with long-term conditions should be able to live as well as possible, and to prevent or delay the onset of complications.
- People with long-term conditions should be able to take control of their own health and to participate in decisions about their care.

The standards are based on the following principles:

- People with long-term conditions should be able to live as well as possible, and to prevent or delay the onset of complications.
- People with long-term conditions should be able to take control of their own health and to participate in decisions about their care.

The standards are based on the following principles:

- People with long-term conditions should be able to live as well as possible, and to prevent or delay the onset of complications.
- People with long-term conditions should be able to take control of their own health and to participate in decisions about their care.

The standards are based on the following principles:

- People with long-term conditions should be able to live as well as possible, and to prevent or delay the onset of complications.
- People with long-term conditions should be able to take control of their own health and to participate in decisions about their care.

The standards are based on the following principles:

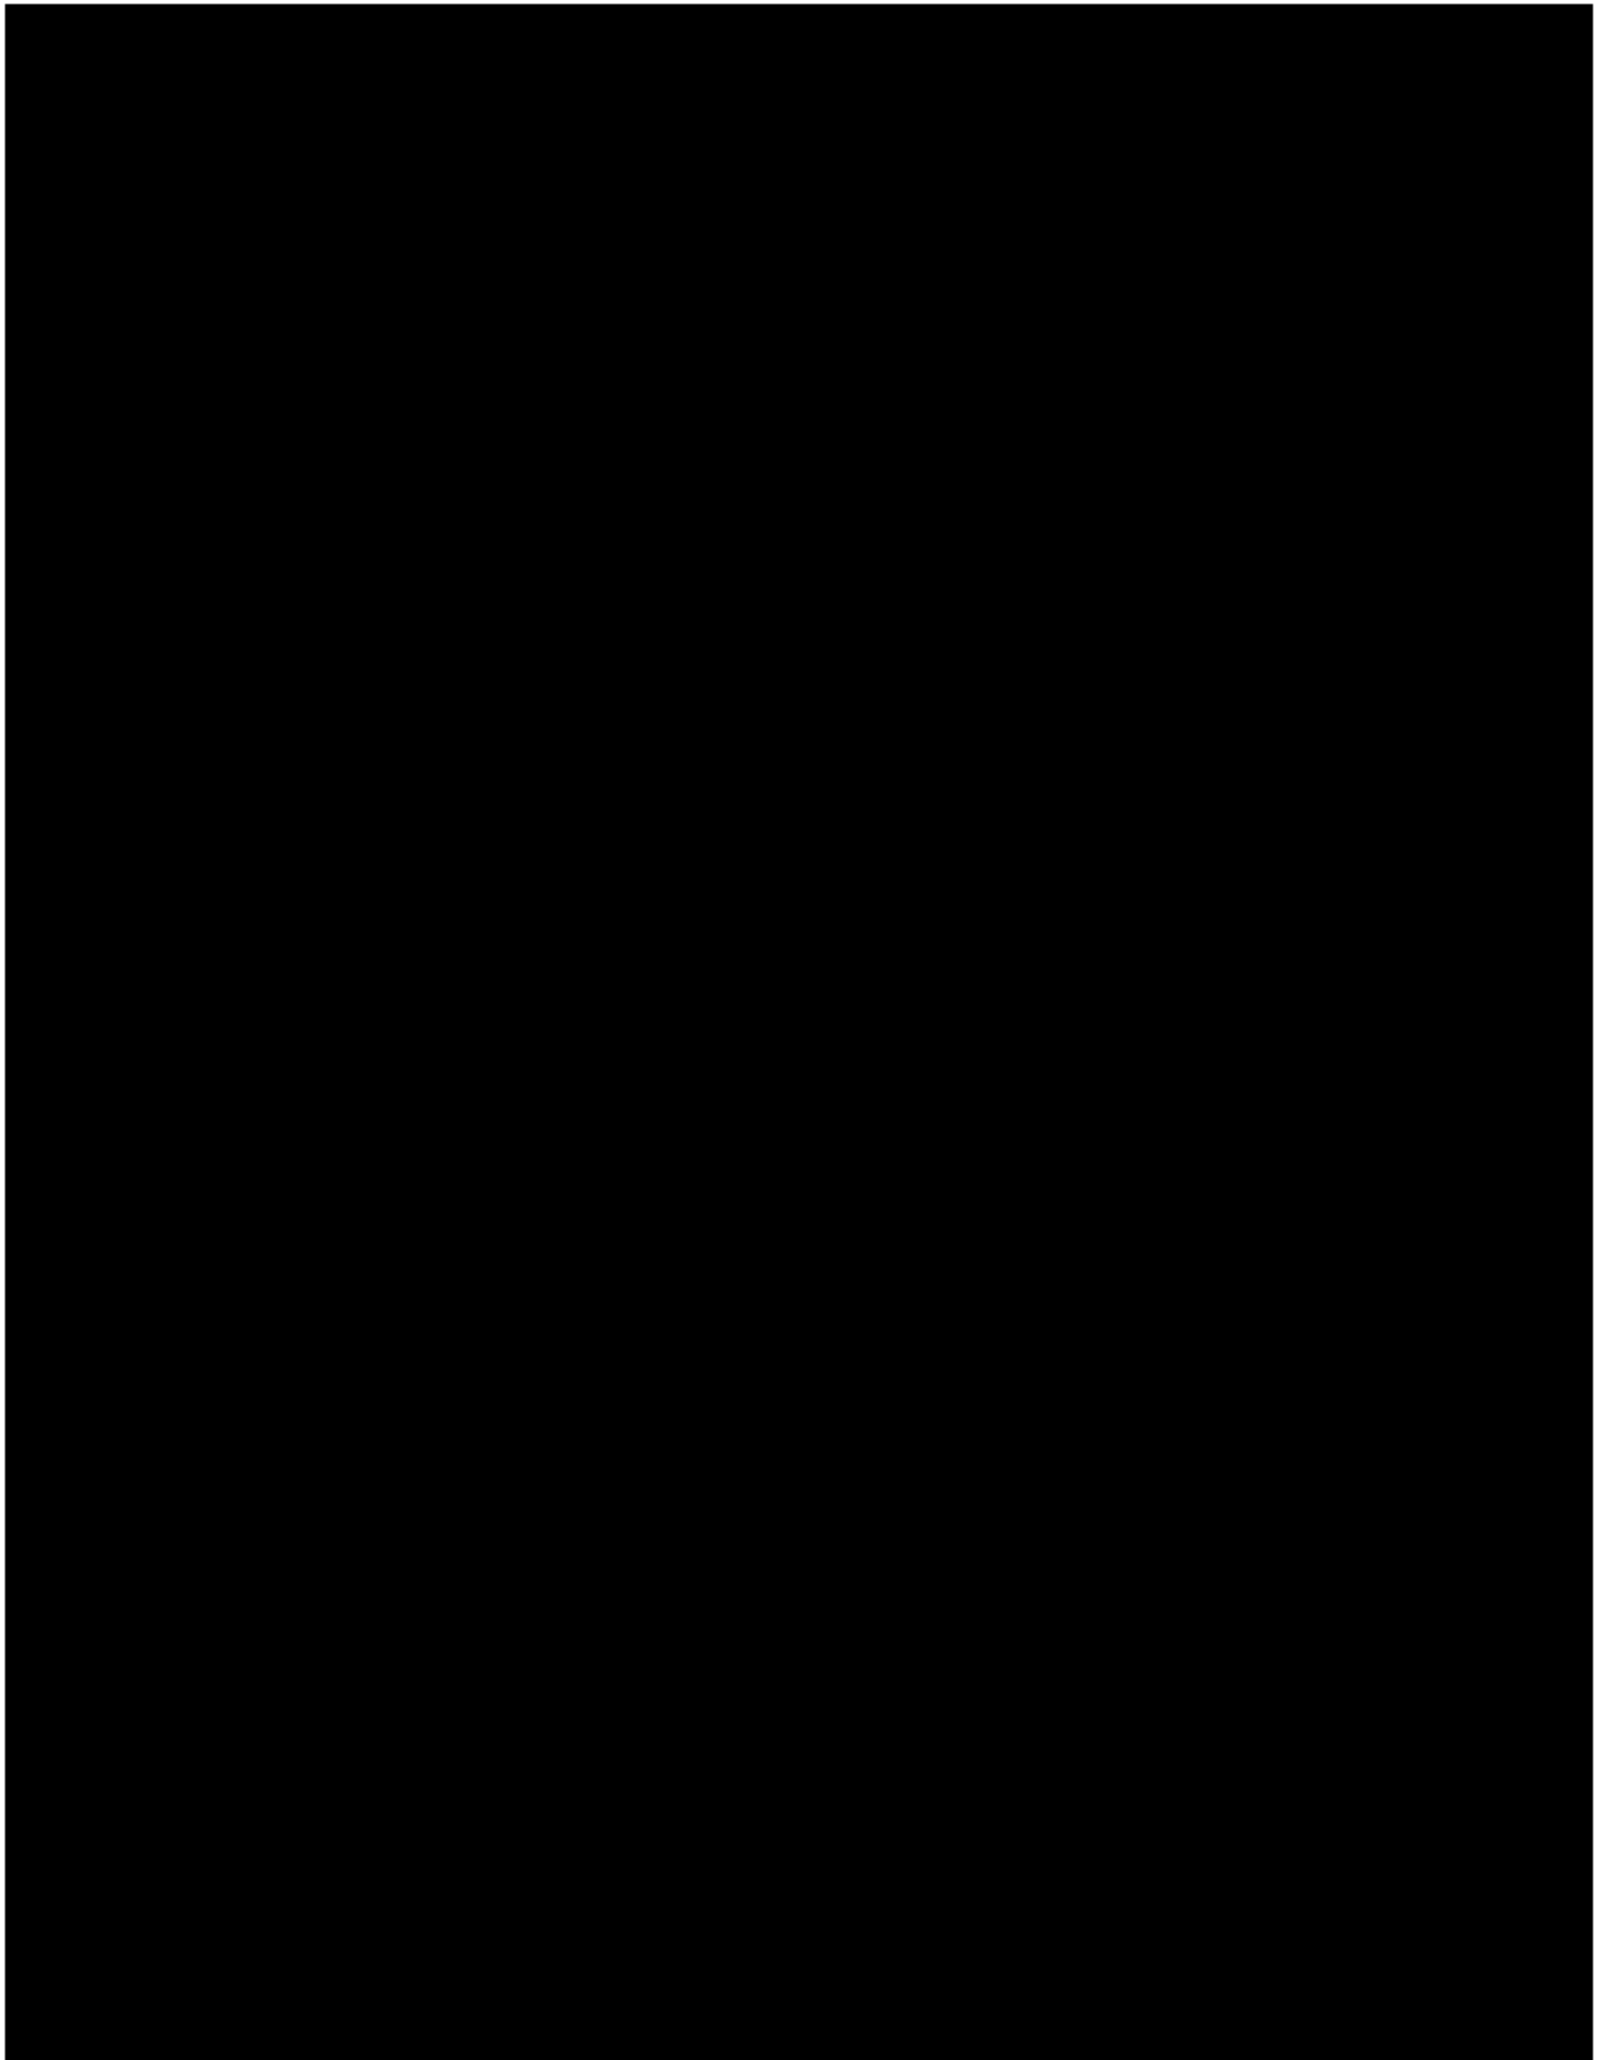

- People with long-term conditions should be able to live as well as possible, and to prevent or delay the onset of complications.
- People with long-term conditions should be able to take control of their own health and to participate in decisions about their care.

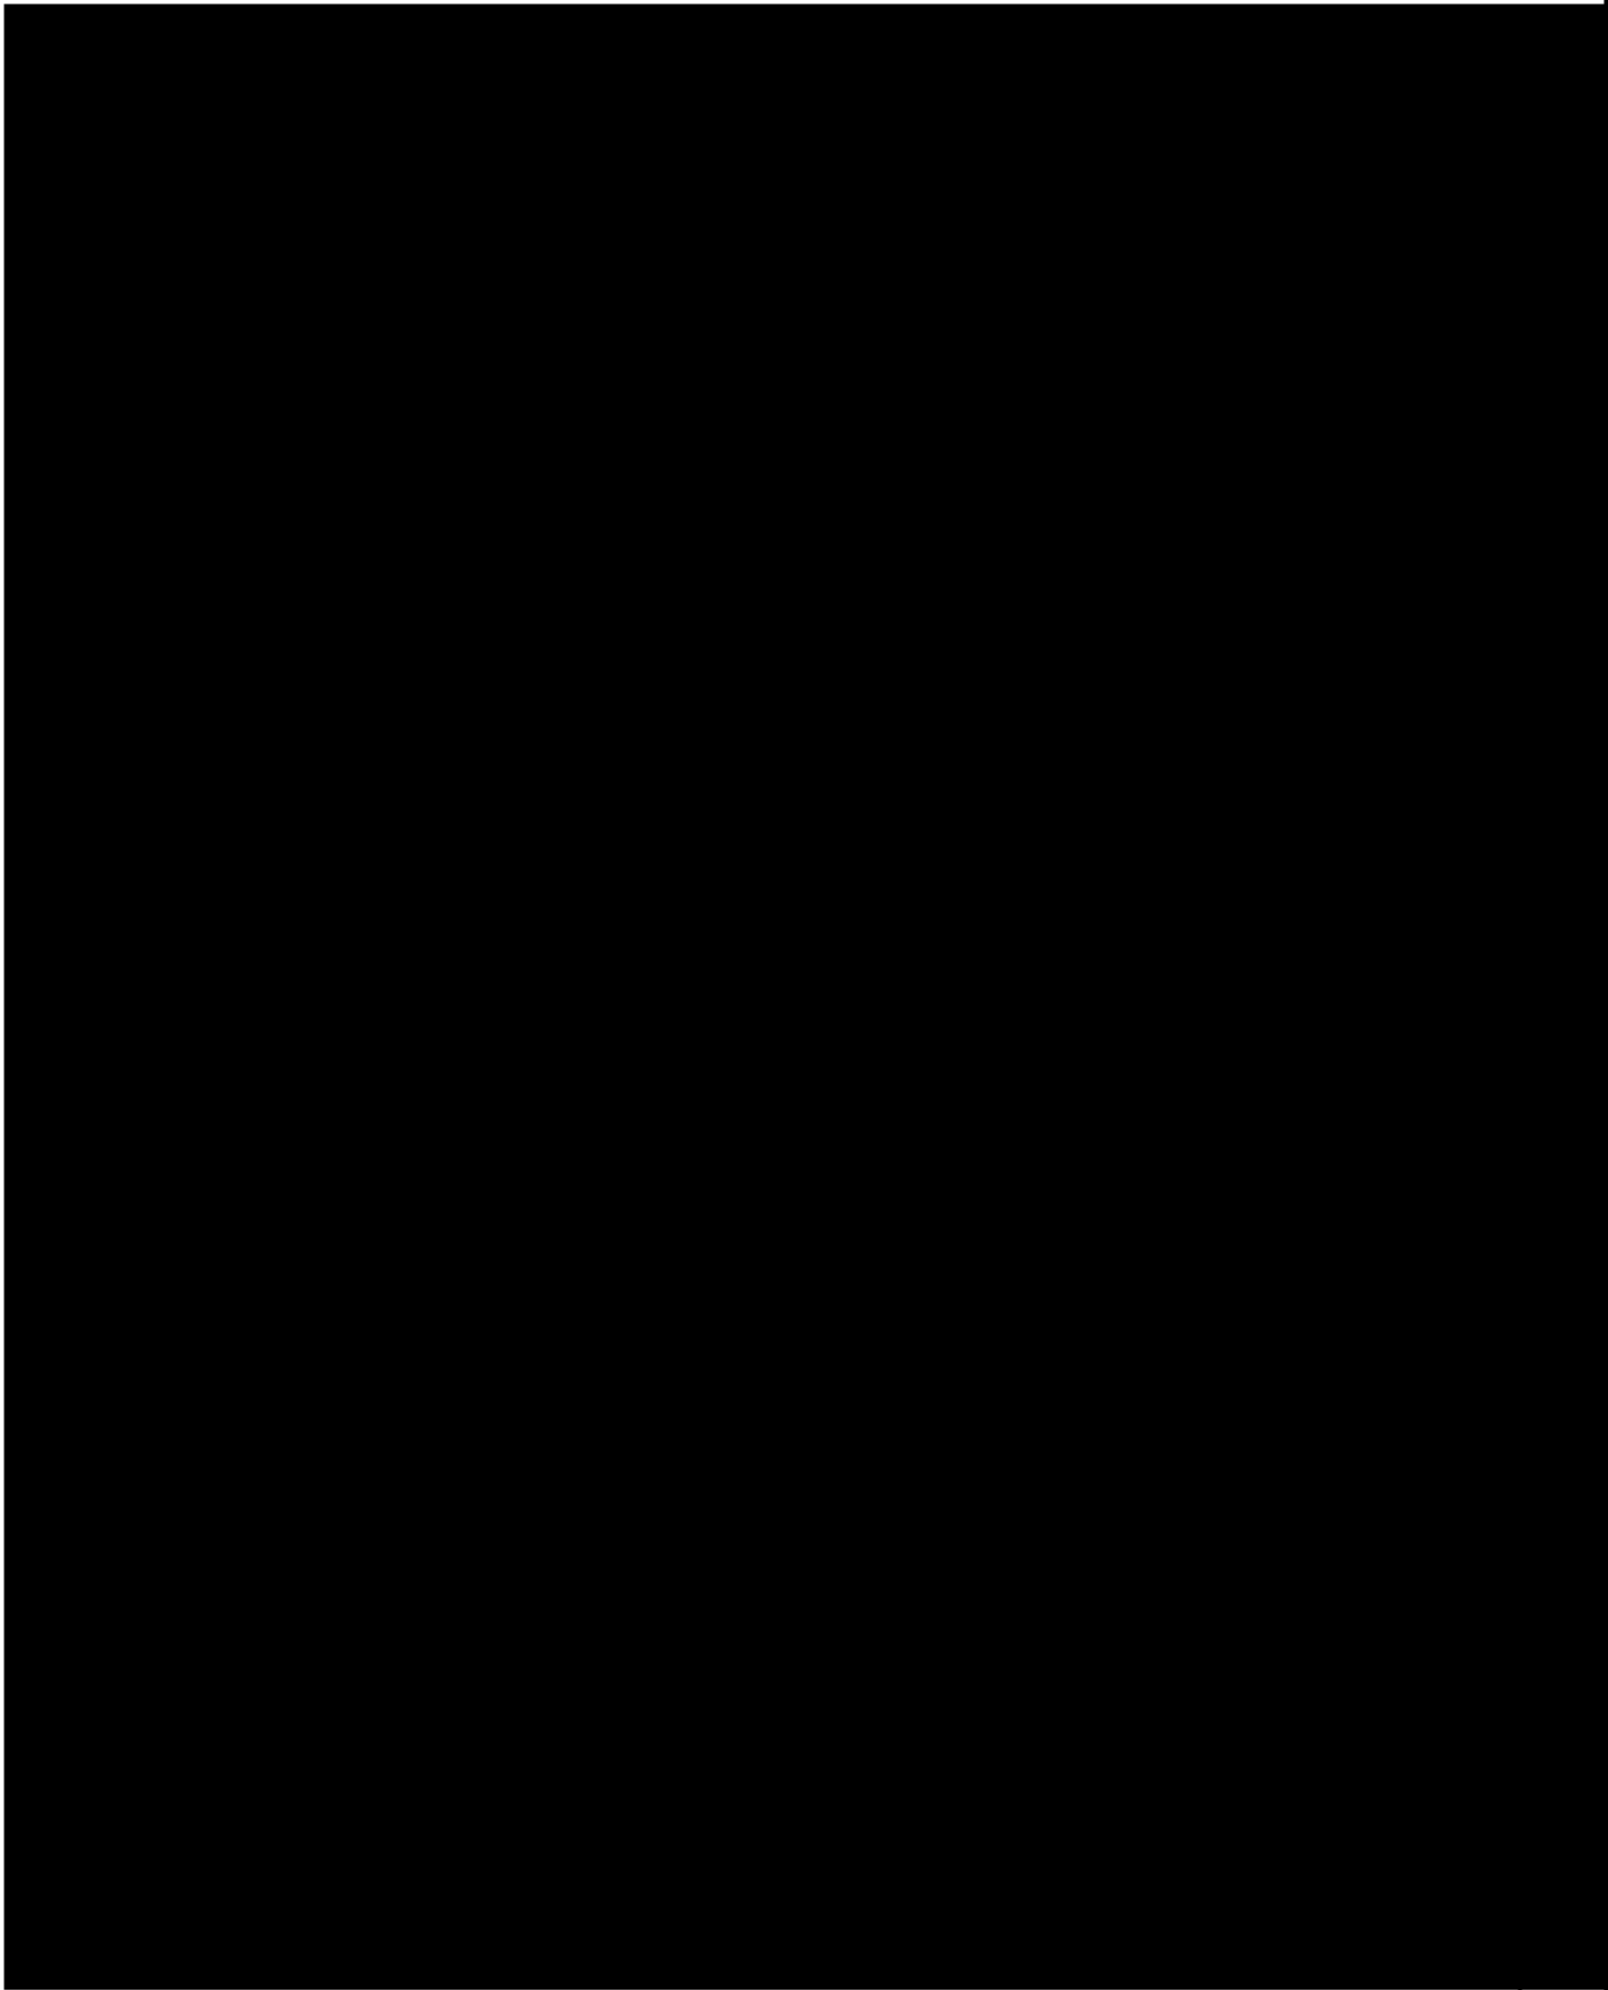

The standards are based on the following principles:
