Defective Ignition
Your reference # 02008-S
July 2002 recall

Dear Sirs:

I received your letter in April informing me that my car has a defective ignition which could start a fire in my car and that I should bring my car to my GM dealer in July 2002 to replace this dangerous defect.

I just learned that my neighbor's car *caught fire while he was driving*. He was lucky to get out alive! This event occurred recently. He had a similar ignition defect recall but, unfortunately, his car did not make it to the date he was supposed to bring it in to be fixed.

Because I am concerned that a similar occurrence may happen to my car I was hoping you could give me an earlier date than July of 2002 to bring my car in to GM.

Please advise.

Very truly yours,
