Narrative Description of Incident(s), Failure(s), Crash(es), and Injury(ies)

Fuel Rail was leaking gas. If I would not of had my van check-out. It would've caught on fire and burned to the ground. myself and Family could've been Trap and burned. This is a life threatening defect. How can they only recall 96-2000 when it began with production of Rams. Its there Responsibility or do there have to be death before its taken care of.

I was Advise to take van to a dealership for repair so I took it to Central Valley Automotive. That was also a very bad experience when I called to complain they just wont return my call.
