the 1990s, the number of people in the UK who are aged 65 and over has increased from 10.5 million to 13.5 million (1990-2000).

There is a growing awareness of the need to address the needs of older people, and the Government has set out a strategy for doing this in the White Paper on *Ageing Better: A New Vision for Older People* (Department of Health 2002). This paper sets out the authors' views on the need to address the needs of older people, and the ways in which this can be done.

Background

The authors are members of the Older People's Research Unit, a research centre based in the School of Health, Behaviour and Society, London School of Hygiene and Tropical Medicine. The Unit is a multi-disciplinary research centre, with members from a range of disciplines, including medicine, psychology, sociology, anthropology, and public health.

The Unit's research is focused on the needs of older people, and the ways in which these needs can be met. The Unit's research has been funded by a range of organisations, including the Department of Health, the Wellcome Trust, and the National Institute for Research in Care of the Elderly.

The Unit's research has been focused on a range of issues, including the needs of older people in care, the needs of older people in the community, and the needs of older people in the workplace.

The Unit's research has been focused on a range of issues, including the needs of older people in care, the needs of older people in the community, and the needs of older people in the workplace.

Older people

The term 'older people' is used to refer to people aged 65 and over. This is the age at which people are eligible for the state pension in the UK.

The number of older people in the UK has increased significantly in recent years. In 1990, there were 10.5 million older people in the UK, and this number has risen to 13.5 million by 2000.

The increase in the number of older people in the UK is due to a combination of factors, including an increase in life expectancy and a decrease in the birth rate.

The increase in life expectancy is due to a number of factors, including improvements in medical care and a healthier lifestyle.

The decrease in the birth rate is due to a number of factors, including a change in social norms and a desire for smaller families.

The increase in the number of older people in the UK has led to a number of challenges, including the need to provide care for older people and the need to address the needs of older people in the workplace.

The need to provide care for older people is a major challenge for the UK. In 2000, there were 1.5 million older people in care in the UK, and this number is expected to rise to 2.5 million by 2020.

The need to address the needs of older people in the workplace is also a major challenge. In 2000, there were 1.5 million older people in the UK who were aged 65 and over, and this number is expected to rise to 2.5 million by 2020.

The need to address the needs of older people in the workplace is a major challenge for the UK. In 2000, there were 1.5 million older people in the UK who were aged 65 and over, and this number is expected to rise to 2.5 million by 2020.

Older people in care

The need to provide care for older people is a major challenge for the UK. In 2000, there were 1.5 million older people in care in the UK, and this number is expected to rise to 2.5 million by 2020.

The need to provide care for older people is a major challenge for the UK. In 2000, there were 1.5 million older people in care in the UK, and this number is expected to rise to 2.5 million by 2020.

The need to provide care for older people is a major challenge for the UK. In 2000, there were 1.5 million older people in care in the UK, and this number is expected to rise to 2.5 million by 2020.

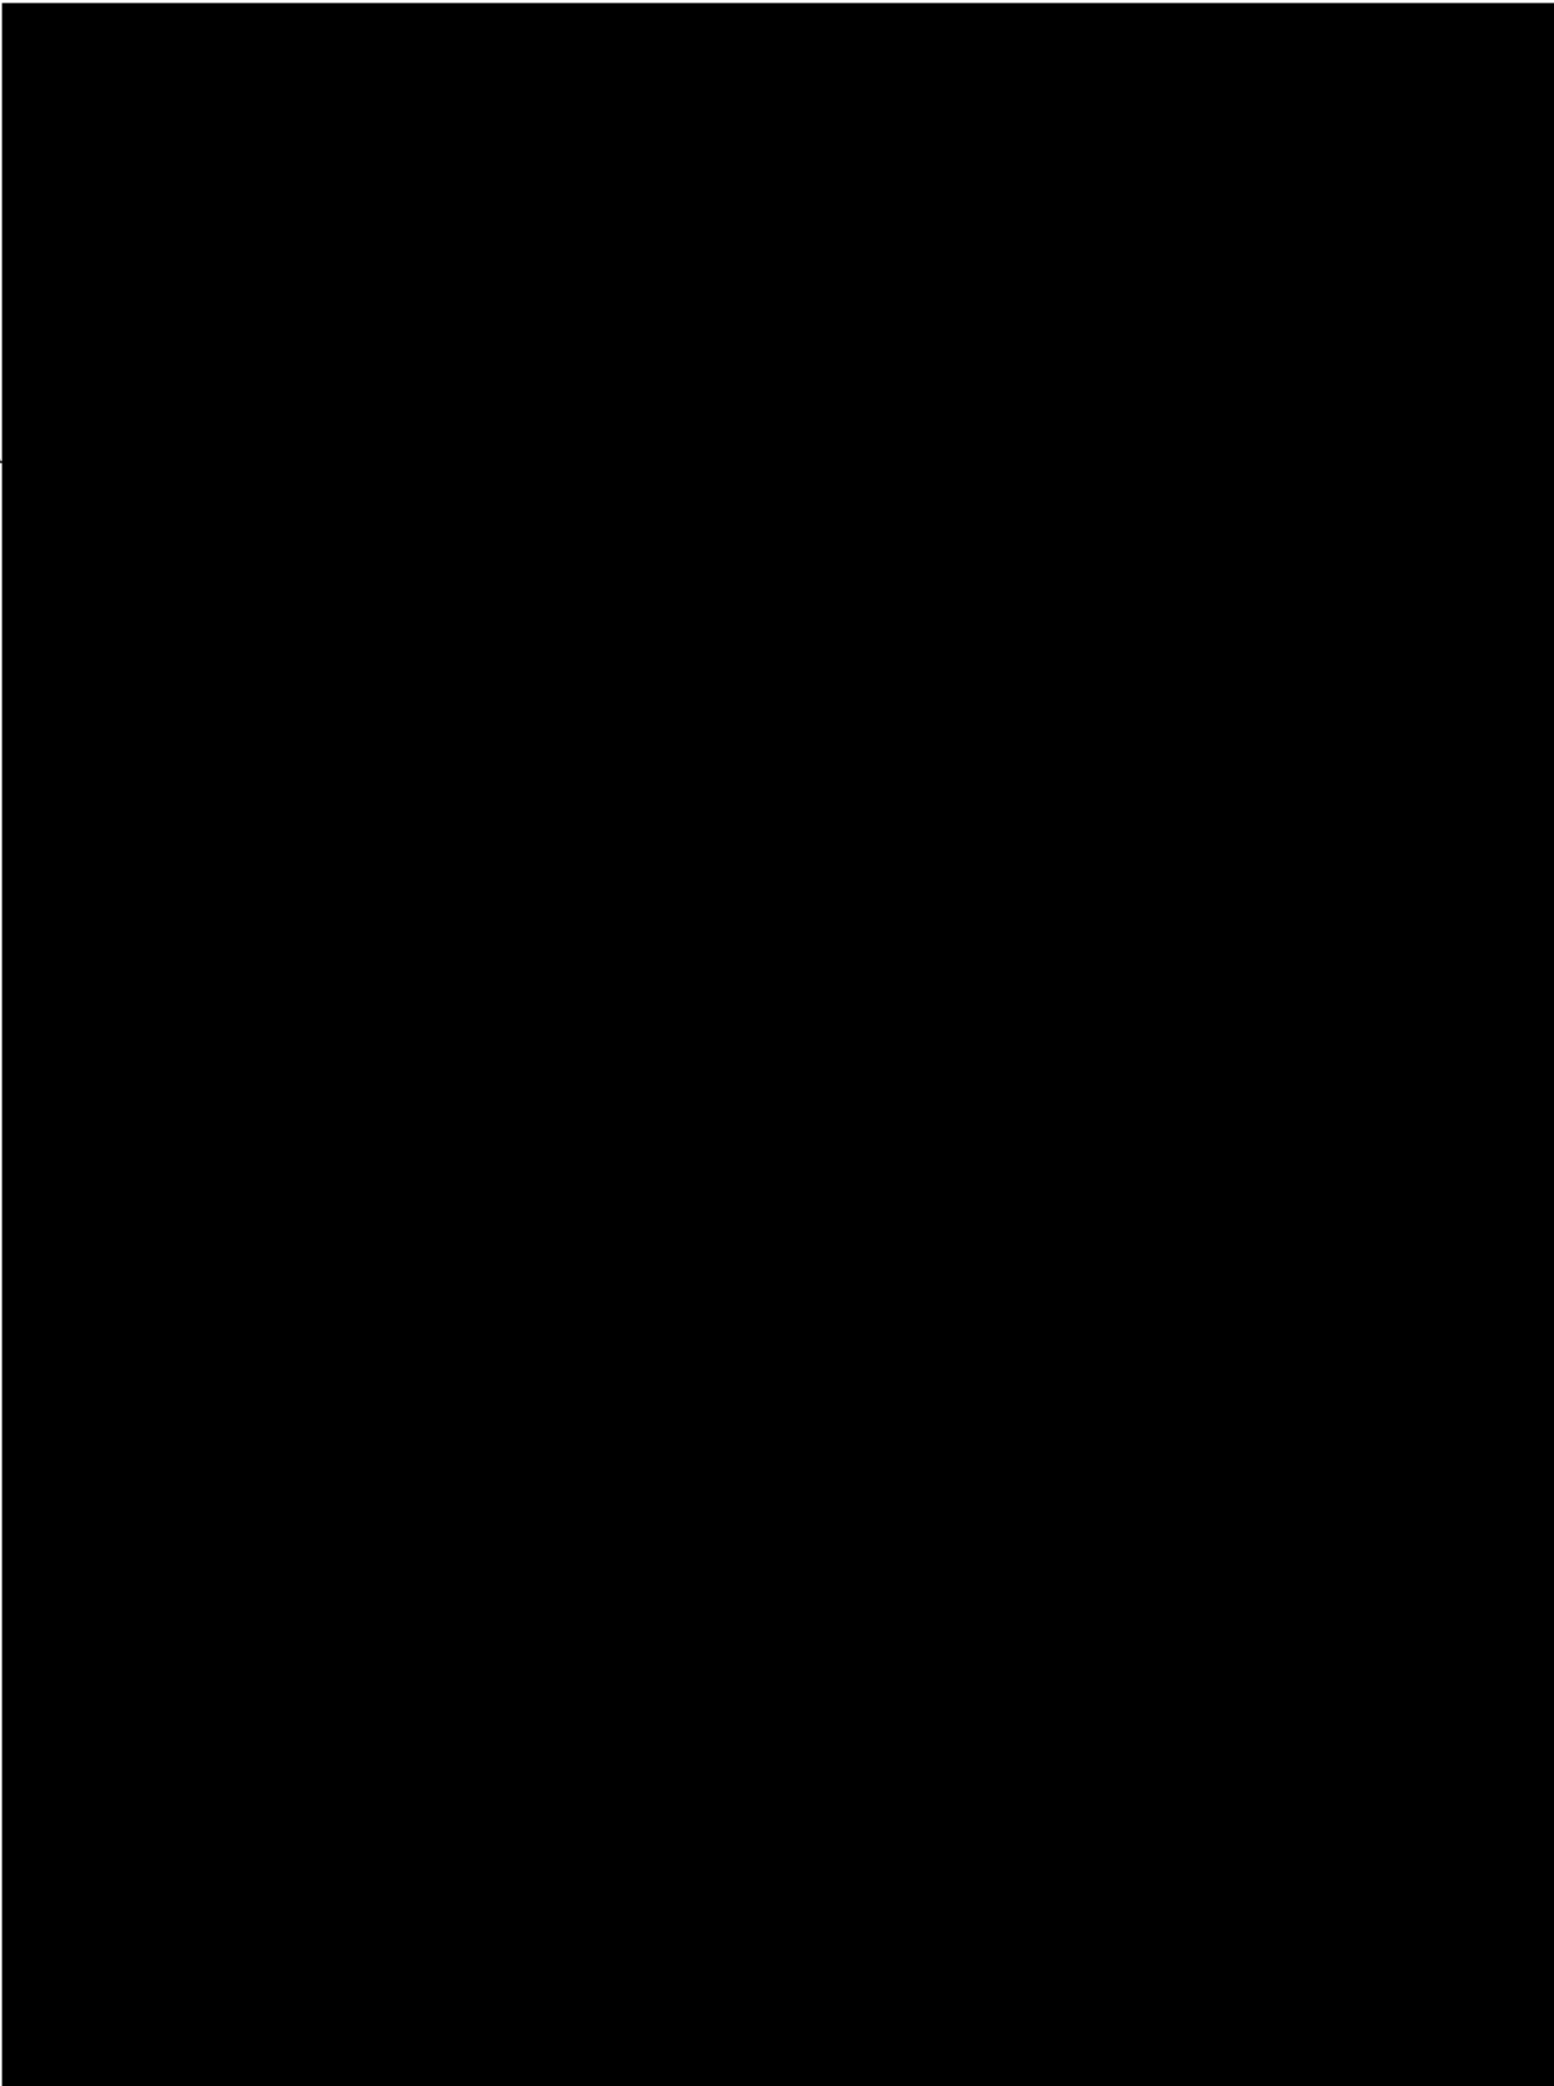

The need to provide care for older people is a major challenge for the UK. In 2000, there were 1.5 million older people in care in the UK, and this number is expected to rise to 2.5 million by 2020.
