When driving down hilly highway during hottest part of day in summer (95°F), engine will suddenly quit firing, as if you turned off the ignition key. If I get off the ~~accelerator~~, accelerator, but do not disengage the clutch, it may start firing again before I come to a stop. However, one time I was going up hill in the middle lane of I-10 N & HO in S.A., it did it and I could not get over to the shoulder. My wife and I came to a complete stop in the middle of I-10. I got it re-started before we were rear-ended.

Fold to show Return Address (no stamp needed) Fasten with tape or staple and mail

INFORMATION ON TIRE FAILURE(S) (IF APPLICABLE)

TIRE IDENTIFICATION NO.	MANUFACTURER/TIRE NAME	SIZE
DOT		

* The identification number consists of 7 to 10 letters and numerals following the letters DOT. It is usually located near the rim flange on the side opposite the whitewall or on either side of a blackwall tire.

NARRATIVE DESCRIPTION (CONTINUED)
