The description of this failure maps to
NHTSA campaign V268000 (included with
bill)

However, when queried - they said my
van did not fall into the recall. Therefore,
I had to pay the cost \$551.97

The severity & danger of this defect is great.
What is more problematic is that my van
was not identified for recall - this was confirmed
when I called Chrysler. This means the
recall is insufficient in scope.

Please let them know!
