INFORMATION ON TIRE FAILURE(S) (IF APPLICABLE)

TIRE IDENTIFICATION NO.*

D O T

MANUFACTURER/TIRE NAME

SIZE

* The identification number consists of 7 to 10 letters and numerals following the letters DOT. It is usually located near the rim flange on the side opposite the whitewall or on either side of a blackwall tire.

NARRATIVE DESCRIPTION (CONTINUED)

My 1993 Jaguar currently has 56,000 miles. For a number of years the driver's seat would move forward while driving without any activation by me. In the past I could hit the reverse button and the seat would respond by moving back. On June 15, 2001 prior to entering the car I found the seat totally forward. I used the reverse button to move the seat back. I drove the car for about 5 mins going about 45 mph when the seat, on its own, moved forward. I quickly hit the reverse button as I had in the past and nothing happened. The seat continued to move forward pushing my chest into the steering wheel and barely allowing me any foot distance to apply the brake pedal. I was finally able to stop the car mainly by using the handbrake. Fortunately I was on a road that had ample space for me to move to the shoulder. I was actually pinned against the steering wheel and could not get out of the car for some 3 mins. After some 3 mins of hitting the reverse button the seat finally reversed.
