INFORMATION ON TIRE FAILURE(S) (IF APPLICABLE)

TIRE IDENTIFICATION NO.*

D O T

MANUFACTURER/TIRE NAME

SIZE

* The identification number consists of 7 to 10 letters and numerals following the letters DOT. It is usually located near the rim flange on the side opposite the whitewall or on either side of a blackwall tire.

NARRATIVE DESCRIPTION (CONTINUED)

December 6, 2000 I brought car in because it was loosing air in all 4 tires and uneven tire wear was detected. They found no problem so they say, the tires were almost bald on the insides of all tires at 32K miles. And at 42K in May they did not pass inspection and that's when they replaced the parts and all 4 tires, why wasn't this picked up in Dec. the first time I brought it in. So now in Oct. I brought it to a different Dodge dealer and they didn't want to touch the car because Mechanicsville Dodge started the job on my car. So I brought it to Mechanicsville Dodge and they called Dodge and their engineers claim I'm the only Avenge owner that has this problem with the front end. Help me settle this please, because right now their answer is just keep rotating the tires and maybe I'll get 25K miles out of a 50K rated tire!!
