(Page 1 through Page 15)

the 1990s, the number of people in the UK who are aged 65 and over has increased by 1.5 million, and the number of people aged 75 and over has increased by 1.2 million (Office for National Statistics 1999). The number of people aged 65 and over is projected to increase to 6.5 million by 2011, and the number of people aged 75 and over to 4.5 million (Office for National Statistics 1999).

There is a growing awareness of the need to address the needs of older people in the UK. The Department of Health (1998) has published a strategy for older people, which sets out a vision for the future of older people's health and social care. The strategy is based on the following principles: older people should be able to live independently and actively; older people should be able to access the services they need; and older people should be able to participate in decisions about their care and services.

The strategy also sets out a number of key objectives for the future of older people's health and social care. These include: to improve the quality of life of older people; to reduce the inequalities in health and social care; to ensure that older people have access to the services they need; and to ensure that older people are able to participate in decisions about their care and services.

The strategy is a key document for the future of older people's health and social care in the UK. It sets out a vision for the future and provides a framework for the development of policies and services for older people. It is a document that should be read by all those who are involved in the care of older people.

2. Methods

2.1. Study

The study was a cross-sectional survey of older people in the UK. The survey was conducted in 1998 and 1999. The survey was conducted in two waves. The first wave was conducted in 1998 and the second wave was conducted in 1999. The survey was conducted in two waves in order to assess the stability of the findings.

The survey was conducted in two waves in order to assess the stability of the findings. The survey was conducted in two waves in order to assess the stability of the findings. The survey was conducted in two waves in order to assess the stability of the findings. The survey was conducted in two waves in order to assess the stability of the findings.

2.2. Sample

The sample was a representative sample of older people in the UK. The sample was drawn from the 1991 Census. The sample was drawn from the 1991 Census in order to ensure that the sample was representative of the population of older people in the UK.
